NV-U44/S

3.5"[1] Portable Satellite Navigation System

The Sony nav-u™ portable satellite navigation system is more than basic navigation, with a slim yet large touch-screen display, easy to use and intuitive functions, you'll be able to keep your eyes on the road, not the screen. The Sony nav-u portable satellite navigation system is the perfect companion for that cross-country trip or short ride across town.

3.5" (measured diagonally) High-brightness touch-screen display[1] with anti-glare

This touch-screen display with Gesture Command™ gives you control via simple, on-screen finger movements. Commonly used commands such as ''take me home' may be accessed by gesturing an inverted 'V' on the screen versus paging through numerous menu screens.

Dual view - 3D Junction Guide

Dual view capability displays dynamic route information, in addition to the conventional map view, to provide an even clearer view of what's at the next turn or in a highway merge scenario, which junction to take.

Pre-Loaded Maps and Content

The NV-U44 comes pre-loaded with map content covering the entire United States, Canada, and Puerto Rico. Enjoy powerful, portable navigation out of the box.

TTS (Text To Speech)

TTS helps eliminate second-guessing when making a turn; the device references street names when providing directions to help keep you on track.

Photo Viewer[2]

View photos of people and places on the go, with Memory Stick Duo™ media[2]

Specifications

Display	
Screen Size	3.5"[1]
